3. I have primary responsibility for constructing the General Assembly’s redistricting databases. I am familiar with the related data holdings and processing of that information to produce various district reports. For the 2011 redistricting effort, we used the Census Bureau’s “2010 Census Redistricting Data (Public Law 94-171) Summary

Under the 2011 Congressional Plan, the total black voting age population was 3.23% and the total non-Hispanic white voting age population was 89.77% in Congressional District 11. Under the 2016 Congressional Plan, the total black voting age population was 3.27% and the total non-Hispanic white voting age population was 89.56% in Congressional District 11.

93. Exhibit 16 shows that under the 2001 Congressional Plan, the total black voting age population was 43.77% and the total non-Hispanic white voting age population was 42.40% in Congressional District 12. Under the 2011 Congressional Plan, the total black voting age population was 50.66% and the total non-Hispanic white voting age population was 32.92% in Congressional District 12. Under the 2016 Congressional Plan, the total black voting age population was 36.20% and the total non-Hispanic white voting age population was 46.57% in Congressional District 12.

94. Exhibit 16 shows that under the 2001 Congressional Plan, the total black voting age population was 28.22% and the total non-Hispanic white voting age population was 59.72% in Congressional District 13. Under the 2011 Congressional Plan, the total black voting age population was 17.02% and the total non-Hispanic white voting age population was 73.44% in Congressional District 13. Under the 2016 Congressional Plan, the total black voting age population was 21.18% and the total non-Hispanic white voting age population was 69.80% in Congressional District 13.

95. Exhibit 17 depicts the 2016 Congressional Plan. Exhibit 18 shows that of North Carolina's 100 counties, the 2016 Congressional Plan contains 87 whole counties and 13 divided counties. Of the 13 divided counties, all 13 are divided into only two congressional districts. None of the 13 divided counties are divided into more than two congressional districts.

96. North Carolina is divided into 2,692 voting districts ("VTDs"), which are units of U.S. Census Bureau geography that, for North Carolina, reflect voter precincts as they existed on January 1st, 2008. A comparison in September of 2014 showed that 2,495 of the VTDs were identical to current precincts at that time. Of the remaining VTDs, all but five represented simple splits or combinations of current precincts. . Exhibit 19 shows that, of the total of 2,692 VTDs in North Carolina, the 2016 Congressional Plan divides only 12 VTDs.

97. Exhibit 20 depicts the congressional redistricting plan, "1992 Congressional Base Plan #10", enacted through the passage of S.L. 1991-7es for the conduct of the 1992 congressional elections (subsequently referred to as , the "1992 Congressional Plan"). Exhibit 20 also includes standard reports from the North Carolina General Assembly's 1990 redistricting system. Those reports depict the demographic characteristics of the 1992 Congressional Plan districts, based on the Census Bureau's "1990 Census of Population and Housing (Public Law 94-171 Data)" along with voter registration and election contest information from that time period.

98. Exhibit 20 also includes a 1990 redistricting system report dated August 27, 1998 that depicts the total number of divided counties within the 1992 Congressional

Plan. Exhibit 20 shows that the 1992 Congressional Plan divided a total of 44 counties. Of those 44 divided counties, 37 counties were placed in two congressional districts. The remaining seven divided counties were placed in three congressional districts.

99. Exhibit 21 consists of the text of S.L. 1991-7es that enacted the 1992 Congressional Plan. While a summary report of the number of divided precincts contained in 1992 Congressional Plan is not available due to the passage of time and the evolution of technology used by legislative staff in redistricting, we do have non-geographic data tables that were extracted from the 1990 redistricting system prior to its decommissioning. I have done a careful analysis using those tables to determine the number of split precincts in the 1992 Congressional Plan. Note that in the 1990 redistricting system, only 69 of the 100 counties in the state contained depictions of the precinct geography (VTDs in census geography terms). Independent of my analysis, staff of the General Assembly's Legislative Analysis Division reviewed the text of S.L. 1991-7es to identify precinct splits. Comparing our results, we agree that there were at least 77 precinct splits in the state under the 1992 Congressional Plan. Three additional precinct splits that appeared in the data table analysis were less than certain based on the session law review.

Pursuant to 28 U.S.C. § 1746, I declare under penalty of perjury that the foregoing is true and correct.

Executed this 4th day of March, 2016.

Ten 2008 statewide contests were included in this analysis: Attorney General, Auditor, Commissioner of Agriculture, Commissioner of Insurance, Commissioner of Labor, Governor, Lieutenant Governor, President of the United States, Superintendent of Public Instruction, and US Senate. This list matches those contests included in the NC General Assembly's standard 2011 redistricting 'stat pack'.

Information is based on the VTD-level 2008 general election returns file posted by the NC State Board of Elections (SBE).

VTD-based totals were disaggregated to the census block level so that they could be re-compiled by district.

Nearly all votes in the SBE's VTD-level election return files are allocated to VTDs. A small portion of the votes in certain counties are reported at the county-wide level. Those county-wide votes are excluded from the disaggregation process.

Plan years correspond with district plans as follows: 2001 = 'Congress ZeroDeviation', 2011 = 'Rucho-Lewis Congress 3', 2016 = '2016 Contingent Congressional Plan - Corrected'.
